

Cybersecurity Managed Service

Eliminating the security gaps in your web applications

A key point in our application's security strategy

Don't overlook web application security at your organization!

Most web applications are tailor-made, be it through integration, customizations. They are less tested than off-the-shelf software and likely to have undiscovered vulnerabilities that can be prone to cyber attacks.

Service Overview

Combining a quarterly conducted vulnerability assessment and round-the-clock 24/7 security monitoring service, Blue Vinegar Cybersecurity Managed Services offers the utmost cyber resilience for every digital environment.

Vulnerability Assessment

- Prioritize & control threats
- The most advanced SQL injection and XSS black box scanning technology
- Black box AND grey box hacking techniques to discover high risk vulnerabilities that can compromise your website and data
- Tests for SQL Injection, XSS, XXE, SSRF, Host Header Injection and over 4500 other web vulnerabilities
- Quarterly vulnerability report to help you prioritize vulnerability

Protect | Detect | Respond

Detecting flaws that can be solved early within the development life cycle

Integrated with the QA process

"There are two types of companies: those that have been hacked, and those who don't know they have been hacked."

— John Chambers
former executive chairman and CEO of Cisco

Why are my Firewall and Intrusion Prevention System Not Enough?

A firewall only protects.

24/7 Security Monitoring Service detects security breaches and provides the necessary information so you can then respond appropriately and recover quickly.

24/7 Security Monitoring

- 24 x 7 Cyber Security Activities and Threats Monitoring
- 24 x 7 Alert Analysis
- 24 x 7 Incident Handling And Responses
- 24 x 7 Global Threat Notification
- 24 x 7 Phone & Email Support
- Security Incidence Alerts
- Device Incidence Alerts
- Global Threats Intelligence
